

HD SH 303 Stainless Steel Custom Flow Control Valve for Showers

Installation Instructions

The 303 Stainless Steel Flow Control Valve for Showers with a National Sanitation Foundation (NSF) Certified Washer is easily installed.

View installation video @ www.hdconservation.com/products

1. Detach showerhead from the post.
2. Run water to clear debris from supply line.
3. Check the FCV washer to ensure it is fully seated in the FCV.
4. Wrap plumbers tape around the thread of the post.
5. Attach the Custom Flow Control Valve to the post and tighten.
6. Ensure the 303 Stainless Steel Flow Control Valve is installed tightly and securely. Be sure not to over tighten.
7. Turn water on before attaching the showerhead and check for leaks (be careful as the stream from the valve is powerful)
8. Reattach showerhead onto the Custom Flow Control Valve by screwing it onto the thread of the FCV and tighten.
9. Check for leaks.
10. Your Shower is now ready for use.
